HUNTING AREA Kustanai

The terrain is relatively flat but varied, with rolling hills and large fields. Around one third of the district is covered by forests of different character, one third with cultivated fields, and the last third with meadows and fallow land. There are also many large and small areas of wetland, all of which make up an ideal biotope for Siberian roe deer.

The hunt is a blend of stalking, lying in wait and drives in a 4WD vehicle. Roe deer are generally more widely dispersed than in Europe, so because of the large distances involved you should be prepared for some driving.

The hunting is always with 1:1 guiding, and places are available for up to 5 hunters on a single district at the same time.

The hunting travel market has never been as chaotic as it is at present. There have always been a mass of smalland medium sized agencies trading on the market, but in recent years the rise of the internet has really opened up the market for direct booking and packages sold by "agents" of more or less transparent character and by agencies based abroad.

A large number of hunters have had their fingers burnt booking "cheap" packages, which rarely proceed as promised, Generally it is only when things go wrong that the unfortunate hunter who bought the tour first realises what the difference between a good Danish travel agency - with all the security that entails -and a questionable foreign seller, really is.

What we offer our customers is a rather unique level of security. Our experienced staff really know our destinations and can provide highly qualified advice tailored to the customer's individual requirements. If you book your hunting tour through us you also have a guarantee against the unlikely event of bankruptcy through the Danish Travel Guarantee Fund.
